## Caburn Hope case study

### Bespoke .NET business process system - Total Rewards System for Caburn Hope

Ballard Chalmers are technology partners to Caburn Hope, providing leading edge solutions for their client communications programmes

### Business Challenge

Caburn Hope are employee communication specialists who balance passion and pragmatism with creativity and innovation. Caburn Hope work with companies internally to deliver employee communications, and externally, delivering marketing solutions.

Caburn Hope have created an innovative online Rewards Communications System for corporate Total Rewards communications, which Ballard Chalmers have been closely involved with in designing and developing the system, and tailoring and deploying these to global corporations such as American Express and BP.

### Solution

The Rewards Communications System integrates and delivers personal reward information securely to individual staff users, such as salary, bonus, stock option and pension figures, as well as flexible benefits.

As well as the Total Reward System, Ballard Chalmers has supported Caburn Hope in the delivery of a variety of communications systems, including interactive CD and USB delivered solutions.

We also provide consultative support at corporate senior management level to enable Caburn Hope to deliver technology based communication solutions.

The Caburn Hope Total Rewards System is a completely bespoke .NET business process system designed and developed by Ballard Chalmers.

All systems are managed and supported by us, with hosting on dedicated server systems at Rackspace Hosting.

The Caburn Hope Total Reward System deployments are secure corporate systems and are not available for public view.

*"Over the past few years BC has consistently surprised me with effective and economic solutions to difficult briefs, especially when dealing with the upgrading and integration of legacy systems. Their new builds are also excellent and I would without hesitation recommend them."*

Account Director, Caburn Hope
